Mantrose Expands Product Line in the Personal Care Industry with Natural Film Formers

WESTPORT, CT (April 24, 2015) - Mantrose-Haeuser has expanded its presence in the cosmetic and personal care industries by offering a range of natural film formers for suncare, skincare, and haircare. Poly-Tresse 500 is a natural multi-functional film forming polymer for hairsprays that delivers long-lasting hold and fast drying without stickiness in non-aerosol hair sprays. This product is available as an easy-to-use aqueous solution, provides a soft, natural feel and excellent high humidity curl retention. Poly-Tresse 500 provides exceptional shine, little to no flaking, and a natural, non-tacky feel.

Poly-Soleil SY 400 is a patent pending natural film forming polymer that provides excellent water resistance, resistance to rub off, a non-sticky smooth skin feel and moisturizing benefits in sunscreen sprays, lotions and daily wear moisturizer formulations. The natural food grade polymer can be formulated directly into alcohol based systems or neutralized into a water or hydro-alcoholic phase. Poly-Soleil SY 400 provides the cosmetic formulator with a new natural film former alternative to the synthetic polymers used in many of today's sun and skin care products.
