

Biosil Technologies is excited to announce the launch of a new line of active ingredients called PAE Complexes. The complexes contain Phytic Acid, Aloe, and an active to deliver a targeted benefit. The concept is that the Phytic Acid prepares the skin by exfoliating dead cells and stimulating cell turnover, allowing the active to penetrate more easily and uniformly, the Aloe to reduce inflammation and irritation, and an active e to deliver a targeted benefit. The new complexes to be launched are, "PAE Complex Hydration and Repair", "PAE Complex Skin Revitalizer", and "PAE Complex Oil Control".
