

Blue Sun International launches new generation of Butterpowders

By James Downey
April 23, 2015

Miami, FL – In preparation for Suppliers Day trade show (Booth 608) - Blue Sun International released today the new generation of Butterpowders. This revolutionary technology is based on the coating of Talc / Mica / rice starch with Shea / Mango / Cocoa butter.

The different distribution of fatty acids delivers unique creamy textures to make up formulations. Additionally, this line of products can be also used in skincare formulations to improve emollience and after feel.

About Blue Sun International

Blue Sun International is a specialty ingredients distributor and manufacturer established with offices in the US and Mexico.

Blue Sun International has experienced large growth due to the innovation of their ingredients and marketing applications.
