

## RISUN Promotes STP Polymer for Hybrid Sealant in ACS

Risun Polymer will attend American Coatings Show 2016, to be held April 12-14, 2016, at the Indiana Convention Center in Indianapolis, Indiana USA. We will present our new generation Silane Terminated Polymer (STP) which combines favorable features of PU and silicon for sealant and adhesive manufacturers who wish to produce safer and better quality silane crosslinked products. As the leading manufacturer in China, Risun Polymer can provide you total solution for hybrid sealants.

**Booth No. : 3088**

## ABOUT RISUN

As the first company manufacturing silane terminated polyether (STP) polymers in China with international advanced technology, we are the outstanding supplier of STP polymer at home and abroad. The customers we target are the sealant, adhesive and surface coating manufacturers who wish to replace the polyurethane and silicone products with the safer and in many cases easier to make silane crosslinked products.

Our technical team have rich experience and professional research in STP polymer, we can provide technical support, formulation and processing suggestions to help our clients make unique STP sealants and adhesives.

As an energetic international fine chemistry company, Risun Polymer will be adhering to the concepts of continuous innovation and improvement, create new value for customers and partners, and contribute to the environment improvement.
