

Blanver is a Brazilian multinational company that develops, manufactures and sells quality **ingredients**, excipients, APIs and medicines for people's health and well-being.

We have customers on the 5 continents and over 30 years experience!

Our ingredients area is recognized for excellent service, global technical support and compliance with major international standards.

As we provide global technical support for the use of our products, we can recognize, identify and work with the main global trends, developing new products, studies, analyses and research on new applications, prototype development, and formulation and reformulation of end products.

We have a well-equipped and structured laboratory and a team of highly qualified professionals.

Our products are: **TABULOSE SC®** Colloidal Microcrystalline Cellulose and **MICROCEL®** Microcrystalline Cellulose, with important functions as: Fat Replacer, Thickener, Suspending Agent, Creaminess Agent, etc., in several applications: Ice Cream, Whipped Topping, Protein Shake RTD, Supplement Tablet, Dairy Beverage, Extruded Puffs and others.

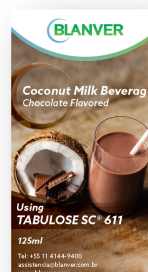

At IFT16 we will showcase these beverage prototypes:

- Chocolate Protein Shake

- Coconut Milk Beverage

We will also have additional application sheets.  
Visit us in our **booth# 2467** to check!
